Your Growth from Knowledge
Our detailed reports give you unique insights to drive your success in the smart home market

We explore the following areas:

- Importance/awareness of smart home relative to other trends (e.g. mobile payments etc.)
- Understanding of the smart home
- Current/potential adoption levels of smart home solutions
- Key drivers/perceived benefits for smart home solutions
- Which smart home products or solutions are of most interest
- Satisfaction with any smart products or solutions currently owned
- Barriers to adoption
- Sectors and brands trusted to deliver smart home solutions
The study covers five main categories within the smart home:

- Security & control
  - Smart blinds or shutters
  - Alarm system
  - Motion sensors for doors & windows
  - Smart detectors
  - IP camera
  - Access control (digital keys)
  - Smart Doorbell
  - Smoke alarm & air quality sensor

- Appliances
  - Smart toothbrush
  - Smart kettle
  - Smart coffee maker
  - Smart air conditioner
  - Smart refrigerator
  - Smart washing machine
  - Robot vacuum cleaner

- Entertainment & connectivity
  - Streaming multi room audio
  - Smart TV
  - Smart set top box
  - Smart Tuner/Amplifier/Receivers
  - Home Plugs
  - Routers
  - Repeaters
  - W-LAN sticks

- Energy & lighting
  - Smart thermostat
  - Energy manager
  - Smart control radiator
  - Smart meter (energy meter)
  - Monitoring of boiler at a distance
  - Smart lighting (smart lamps)
  - Smart light control

- Health
  - Personal scale
  - Blood pressure monitor
  - Fitness and activity tracker
  - Smart Baby monitors
  - Medication monitor/reminder
  - Disease activity monitor
Scope of the study

Exploring the awareness, understanding and potential of smart home solutions…

1. Purchase history and introduction to smart home
   - Current household/personal device ownership
   - Access to subscription-based online content
   - Familiarity with current technologies and tech trends
   - Understanding the smart home concept – including knowledge of products, devices and services

2. Technology within the home
   - Attitudes to purchasing technology within the home

3. Assessing the smart home
   - Appeal and usefulness of smart home technology in fulfilling current needs
   - Believability and understanding of smart home technology

4. Smart home: appeal, ownership, purchase intent and barriers
   - Appeal of smart home product and solution categories
   - General attitudes to purchasing products and solutions
   - Current use/future interest in specific smart home products and services
   - Satisfaction with products and services currently owned
   - Interest in purchasing smart home products / solutions in the near future
   - Subscription type, installation and maintenance preference
   - Barriers to purchasing smart home technology
   - Sources consulted prior to purchasing smart home technology
Scope of the study (continued)

…both now and in the future

5. Smart technology within the home
General attitudes to smart home technology

6. Suppliers, services and communication within the smart home
- Expected channels / providers of smart home services
- Type of suppliers trusted to provide smart home services
- Attitudes to a single vendor providing smart home technology
- Devices / technologies used to control smart home technologies
- Expectations of communication between smart home devices

7. Early adopters
- GfK proprietary questions to identify Leading Edge Consumers

8. Consumer demographics
- Respondent demographics – including household conditions, employment status and income bands
About the reports

We have 7 market reports and a global market report available for purchase:

Cost per report: $5k - £3.5k - €5k
What is included:
- PowerPoint report
- Data tabulations

OFFER

- Volume discount available for confirmed sales until end of 2015
- Purchase all 8 reports together for $25k - £16k - €25k

Report availability

Week commencing 23rd November

Week commencing 7th December

Week commencing 14th December

January 2015
