RNZ Combo: RNZ Concert or RNZ National

Station Share of All Radio: Station Share (%) is the percentage of listening during a given time period tuning to a particular station. Station Share in this report is based on all radio listening. Traditionally adding together share figures for all radio stations within a given time period sums to 100, however with only the share figures for RNZ stations shown in this report the shares will not add to 100.

It is important to note that these share figures cannot be compared with the Total NZ - Commercial Survey results, as the commercial share figures are based on listening to commercial radio stations only, whereas the shares reported here are based on listening to all radio stations.

All Radio Listeners: This is the number of weekly listeners to all commercial and non-commercial radio in the Total New Zealand Sample.

Total New Zealand is a Nationwide survey and includes Auckland, Wellington, Christchurch, Northland, Waikato, Tauranga, Rotorua, Hawke's Bay, Taranaki, Manawatu, Nelson, Dunedin, Southland, and a sample made up of the remainder of New Zealand, excluding The Chatham Islands.

n.b. The S4 2018 release does not include an S4 release for the Waikato region. The weather effect that took down the Ruru transmission tower continues to impact coverage in the area and as a result no surveys will occur in Waikato until 2019. All historic S3 2017 data for Waikato will be carried forward for the remaining 2018 results for both Total NZ and Waikato markets. The industry requests that all users ensure all data used for these markets is clearly identified within the source.
